

Iran: Deal or No Deal

NATIONAL SECURITY
PROGRAM

Bottom line, the deal will:

- Reduce the overall number of centrifuges by two-thirds.
- Cut the current stockpile of 10,000 kg of low-enriched uranium to 300 kg.
- Block all three paths Iran has to obtain a nuclear weapon: uranium, plutonium, and covert.
- Increase the breakout time from 2 months to 1 year.
- Give IAEA inspectors access to all nuclear facilities and the entire supply chain.
