40 We need to pause and then dramatically slow the progress of artificial intelligence to prevent it from harming humans or otherwise taking over our lives in a way that cannot be undone.	43	27	4	14	9	2	**71**	**24**	**47**
41 We should be accelerating the development of artificial intelligence because the technology is already working to improve our lives, increasing our productivity, discovering life-saving scientific breakthroughs and solving other major problems in society.....	13	32	7	23	22	3	**46**	**45**	**1**
42 As artificial intelligence rapidly improves and enters more phases of our lives, we need a comprehensive plan to advance our understanding of the technology, protect people from any possible risks and carefully implement AI in ways that continue to improve our lives.....	42	38	3	7	7	3	**80**	**14**	**66**
43 There are real concerns with artificial intelligence and data centers that we need to address, but AI is happening. The answer is not to shut down development of a technology that has such life-changing upsides. We can balance the benefits and the risks without getting left behind.....	25	45	3	14	10	3	**70**	**24**	**46**

44 We need to create a national set of standards for the use of artificial intelligence that protects us from potential harms but also allows the United States to remain a leader in a field that will dominate the economy and that could help raise standards of living for billions of people.	38	38	4	9	7	4	**76**	**16**	**60**
45 While artificial intelligence is becoming more and more a part of our lives, we still need to carefully monitor how this technology is used around our kids. Much like we need to protect children from the potential harm of social media and the internet, we should prioritize making sure they have a healthy relationship with AI.	60	23	2	6	7	2	**83**	**13**	**71**
