

# TIMELINE OF JOINT COMPREHENSIVE PLAN OF ACTION (JCPOA) IMPLEMENTATION

The framework for an Iran nuclear deal reached in Lausanne (formally the Parameters for a Joint Comprehensive Plan of Action or JCPOA) contains a number of provisions that halt or reverse Iran's nuclear program. The timeline below breaks down the most significant provisions of the deal between the world powers and Iran, and depicts their corresponding timeframes.\*

\*These timelines are based on the parameters for a Joint Comprehensive Plan of Action released by the Obama Administration on April 2, 2015. Available here: <http://www.state.gov/r/pa/prs/ps/2015/04/240170.htm>.

\*\*For their part, Iranian leaders have omitted or contradicted elements of the U.S.'s Parameters document, including claiming the limit on low enriched uranium applies only for a 10-year period. Such discrepancies remain to be resolved by the June 30 negotiating deadline.
